ABSTRACT

5 A head belt of head magnifying glass includes a first and a second head belt set up
at both sides of the fixer of magnifying glass. More than one buttoning holes are made on
the first head belt vertically. A buttoning seat stretches out from the second head belt. A
vacancy forms between said buttoning seat and the second head belt. A through hole is
made at the inner and of the buttoning seat and a movable plate is fixed on the buttoning
seat. The movable plate is pivoted by its both sides at near the middle part of the lateral
sides of buttoning seat. A clamping key is established at the end where the movable plate
10 corresponds with the through hole of buttoning seat and a spring plate is built at the other
end. It is easy adjustable by inserting the first head belt in the above mentioned vacancy and
buttoning up the clamping key with the buttoning hole and durableness of head belt is thus
achieved.
